Invited Papers

X-ray diffraction studies of porous silicon 1
D. Bellet, G. Dolino (Saint-Martin d'Hères, France)

The dielectric function of porous silicon – how to obtain it and how to use it 7
W. Theiß (Aachen, Germany)

Light-emitting and photoconductive diodes fabricated with conjugated polymers 13
J.J.M. Halls, D.R. Baigent, F. Cacialli, N.C. Greenham, R.H. Friend, S.C. Moratti, A.B. Holmes (Cambridge, UK)

Preparation of Porous Silicon and Electrochemistry

Illumination-assisted formation of porous silicon 21
M. Thönissen, M.G. Berger, R. Arens-Fischer, O. Glück, M. Krüger, H. Lüth (Jülich, Germany)

Photo- and potential-controlled nanoporous silicon formation on n-Si(111): an in-situ FTIR Investigation 25
J. Rappich, H.J. Lewerenz (Berlin, Germany)

High aspect ratio silicon pillars fabricated by electrochemical etching and oxidation of macroporous silicon 29
H.W. Lau, G.J. Parker, R. Greef (Southampton, UK)

Thermal nitridation of p-type porous silicon in ammonia 32
V. Morazzani, J.L. Cantin, C. Ortega, B. Pajot, R. Rahbi, M. Rosenbauer, H.J. Von Bardeleben (Paris, France), E. Vazsonyi (Budapest, Hungary)

Investigation of different oxidation processes for porous silicon studied by spectroscopic ellipsometry 36
U. Frotscher, U. Rossow, M. Ebert, C. Pietryga, W. Richter (Berlin, Germany), M.G. Berger, R. Arens-Fischer, H. Münder (Jülich, Germany)

Electrical contact to porous silicon by electrodeposition of iron 40
F. Ronkel, J.W. Schultze (Düsseldorf, Germany), R. Arens-Fischer (Jülich, Germany)

Mechanisms of Light Emission

Mechanism of visible photoluminescence from oxidized silicon and germanium nanocrystallites 44
Y. Kanemitsu (Ibaraki, Japan)

Luminescence and Raman scattering from porous silicon under high hydrostatic pressure: a test for the present models of luminescence 47
J. Zeman, M. Zigone, G.L.J.A. Rikken, G. Martinez (Grenoble, France)

Investigation of the non-radiative processes in porous silicon 51
G. Amato, L. Boarino, N. Brunetto, A.M. Rossi (Turin, Italy), A. Parisini (Bologna, Italy)

Transient laser-induced grating spectroscopy in porous silicon 55
R. Tomasiunas (Strasbourg, France), I. Pelant, A. Hospodková, V. Kohlová, P. Knápek (Praha, Czech Republic), R. Lévy, J. Moniatte, J.B. Grun, B. Hönerlage (Strasbourg, France)

Photoluminescence dynamics of porous silicon: picoseconds to milliseconds 58
J. Kudrna, F. Trojánek, I. Pelant (Prague, Czech Republic), S. Daniš (Rožnov pod Radhoštěm, Czech Republic), V. Kohlová, P. Malý (Prague, Czech Republic)

Elsevier Science S.A.

Characterisation of Porous Silicon Properties

An in-situ method of monitoring the surface area of porous silicon 61
L.M. Peter, D.J. Riley, R.I. Wielgosz (Bath, UK)

Bimodal size distribution in p^- porous silicon studied by small angle X-ray scattering 65
M. Binder, T. Edelmann, T.H. Metzger (München, Germany), G. Mauckner (Ulm, Germany), G. Goerigk (Jülich, Germany), J. Peisl (München, Germany)

X-ray diffraction investigation of porous silicon superlattices 69
D. Buttard, D. Bellet (Saint-Martin d'Hères, France), T. Baumbach (Grenoble, France)

Excitation wavelength dependence of Raman and photoluminescence spectra of porous Si membranes 73
S. Guha (Washington, DC, USA), P. Steiner, F. Kozlowski, W. Lang (Munich, Germany)

Anodic oxidation of p- and p^+-type porous silicon: surface structural transformations and oxide formation 76
J.L. Cantin, M. Schoisswohl, A. Grosman, S. Lebib, C. Ortega, H.J. Von Bardeleben (Paris, France), É. Vázsonyi, G. Jalsovszky (Budapest, Hungary), J. Erostyák (Pécs, Hungary)

Light scattering from porous silicon 80
G. Lérondel, R. Romestain, F. Madéore, F. Muller (St. Martin d'Hères, France)

Optical non-linearity and hysteresis in porous silicon 84
P. Malý, J. Kudrna, F. Trojánek, A. Hospodková (Prague, Czech Republic)

Other Light-Emitting Structures

Photoluminescence studies of light emission from silicon implanted and annealed SiO_2 layers 88
P. Mutti, G. Ghislotti (Milano, Italy), L. Meda (Novara, Italy), E. Grilli, M. Guzzi, L. Zanghieri, R. Cubeddu, A. Pifferi, P. Taroni, A. Torricelli (Milano, Italy)

Defects and visible photoluminescence in porous $Si_{1-x}Ge_x$ 92
M. Schoisswohl, J.L. Cantin, M. Chamarro, H.J. Von Bardeleben (Paris, France), T. Morgenstern, E. Bugiel, W. Kissinger (Frankfurt(Oder), Germany), R.C. Andreu (Zaragoza, Spain)

On the structural origin of the photoluminescence in silicon powder produced in PECVD processes 96
J. Costa, P. Roura, A. Canillas, E. Pascual, J.R. Morante, E. Bertran (Barcelona, Spain)

Continuously tunable photoluminescence from Si^+-implanted and thermally annealed SiO_2 films 100
T. Fischer, V. Petrova-Koch (Garching, Germany), K. Shcheglov (Pasadena, CA, USA), M.S. Brandt, F. Koch (Garching, Germany)

Visible photoluminescence from silicon nanocrystals formed in silicon dioxide by ion implantation and thermal processing 104
T. Shimizu-Iwayama, Y. Terao, A. Kamiya, M. Takeda (Aichi, Japan), S. Nakao, K. Saitoh (Nagoya, Japan)

Correlation between microstructure and photoluminescence of nanocrystalline silicon powder prepared by laser-induced CVD 108
S. Tamir, S. Berger (Haifa, Israel)

Porous Silicon Luminescence

On the origin of blue luminescence arising from atmospheric impregnation of oxidized porous silicon 112
L.T. Canham, A. Loni, P.D.J. Calcott, A.J. Simons, C. Reeves, M.R. Houlton, J.P. Newey, K.J. Nash, T.I. Cox (Great Malvern, UK)

Excitation of the porous silicon photoluminescence by a multiphoton vibronic process 116
J. Diener, M. Ben-Chorin, D.I. Kovalev, S.D. Ganichev, F. Koch (Garching, Germany)

Polarization of porous silicon photoluminescence: alignment and built-in anisotropy 120
D. Kovalev, M. Ben Chorin, J. Diener, F. Koch (Garching, Germany), A. Kux (Saint Martin d'Heres, France), Al.L. Efros, M. Rosen (Washington, DC, USA), N.A. Gippius, S.G. Tikhodeev (Moscow, Russia)

Mechanisms of luminescence tuning and quenching in porous silicon 123
L.M. Peter, D.J. Riley, R.I. Wielgosz, P.A. Snow, R.V. Penty, I.H. White (Bath, UK), E.A. Meulenkamp (Eindhoven, Netherlands)

Investigation of the quenching mechanisms of the porous silicon luminescence 130
M.A. Hory, A. Bsiesy, R. Hérino, M. Ligeon, F. Muller, J.C. Vial (Grenoble, France)

Temperature-dependent photoluminescence in porous amorphous silicon 134
E. Bustarret, E. Sauvain (Grenoble, France), M. Ligeon (St. Martin d'Hères, France), M. Rosenbauer (Stuttgart, Germany)

Porous Silicon Applications

A novel capacitor technology based on porous silicon 138
V. Lehmann, W. Hönlein, H. Reisinger, A. Spitzer, H. Wendt, J. Willer (München, Germany)

Porous silicon multilayer optical waveguides 143
A. Loni, L.T. Canham (Malvern, UK), M.G. Berger, R. Arens-Fischer, H. Munder, H. Luth (Julich, Germany), H.F. Arrand, T.M. Benson (Nottingham, UK)

Characterization of porous silicon-on-insulator films prepared by anodic oxidation 147
C.H. Lee, C.C. Yeh, H.L. Hwang, K.Y.J. Hsu (Hsinchu, Taiwan)

Two-dimensional infrared photonic crystal based on macroporous silicon 151
U. Grüning, V. Lehmann (München, Germany)

Electroluminescence of Porous Silicon

A porous silicon light-emitting diode with a high quantum efficiency during pulsed operation 155
N. Lalic, J. Linnros (Kista-Stockholm, Sweden)

Influence of different metallic contacts on porous silicon electroluminescence 159
P. Steiner, A. Wiedenhofer, F. Kozlowski, W. Lang (Munich, Germany)

Time-resolved electroluminescence of porous silicon 164
F. Kozlowski, C. Sailer, P. Steiner, B. Knoll, W. Lang (München, Germany)

Visible light from aluminum–porous silicon Schottky junctions 168
S. Lazarouk, P. Jaguiro, S. Katsouba (Minsk, Belarus), S. La Monica, G. Maiello, G. Masini, A. Ferrari (Rome, Italy)

Strong 1.54 μm luminescence from erbium-doped porous silicon 171
A. Dorofeev, E. Bachilo, V. Bondarenko, N. Gaponenko, N. Kazuchits, A. Leshok, G. Troyanova, N. Vorozov, V. Borisenko (Minsk, Belarus), H. Gnaser, W. Bock, P. Becker, H. Oechsner (Kaiserslautern, Germany)

Electrical and Transport Properties of Porous Silicon

Conduction in porous silicon contacted by a liquid phase 175
B. Gelloz, A. Bsiesy, F. Gaspard, F. Muller (Saint Martin d'Hères, France)

Electrical characterization of metal Schottky contacts on luminescent porous silicon 179
A. Diligenti, A. Nannini, G. Pennelli, V. Pellegrini, F. Fuso (Pisa, Italy), M. Allegrini (Sant'Agata, Italy)

Electronic properties of thin Au/nanoporous-Si/n-Si structures 183
Th. Dittrich, K. Kliefoth, I. Sieber, J. Rappich, S. Rauscher (Berlin, Germany), V.Yu. Timoshenko (Moscow, Russia)

Charge transport in porous silicon: considerations for achievement of efficient electroluminescence 187
J. Kočka, J. Oswald, A. Fejfar, R. Sedlačík, V. Železný, H. The-Ha, K. Luterová, I. Pelant (Praha, Czech Republic)

Investigation of photoelectrical properties and carrier transport in porous silicon structures by the transient grating technique 191
K. Jarašiūnas, V. Mizeikis, M. Sūdžius, L. Subačius, K. Grigoras, I. Šimkiene (Vilnius, Lithuania)

Residual electrolyte as a factor influencing the electrical properties of porous silicon 195
V.P. Parkhutik (Valencia, Spain)

Porous Silicon: Material, Technology and Devices (Poster Session)

Preparation of thin nanoporous silicon layers on n- and p-Si 200
Th. Dittrich, I. Sieber, S. Rauscher, J. Rappich (Berlin, Germany)

Drying of porous silicon: a Raman, electron microscopy, and photoluminescence study 204
G. Amato, V. Bullara, N. Brunetto, L. Boarino (Turin, Italy)

Effect of light intensity on photoluminescence properties of n-type porous silicon 208
A. Abouliatim, P. Joubert, P. Guyader (Lannion, France)

Influence of anodization time and current density on the photoluminescence of porous N–Si 212
P. Martín, J.F. Fernandez, F. Cuevas, M. Algueró, C. Sánchez (Madrid, Spain)

Influence of photoluminescence and trapping on the photovoltage at the por-Si/p-Si structure 216
V.Yu. Timoshenko, P.K. Kashkarov, A.B. Matveeva, E.A. Konstantinova (Moscow, Russia), H. Flietner, Th. Dittrich (Berlin, Germany)

About the origin and the mechanisms involved in the cracking of highly porous silicon layers under capillary stresses 219
O. Belmont, C. Faivre, D. Bellet, Y. Brechet (Saint-Martin d'Hères, France)

Characterization of different porous silicon structures by spectroscopic ellipsometry 223
M. Fried, T. Lohner, O. Polgár, P. Petrik, É. Vázsonyi, I. Bársony (Budapest, Hungary), J.P. Piel, J.L. Stehle (Bois-Colombes, France)

Enhanced light absorption in anodically etched silicon wafers 228
K. Grigoras, A. Krotkus, V. Pačebutas, J. Kavaliauskas, I. Šimkienė (Vilnius, Lithuania)

The influence of the doping level on the optical properties of porous silicon 231
S. Hilbrich, W. Theiß (Aachen, Germany), R. Arens-Fischer, O. Glück, M.G. Berger (Jülich, Germany)

Polarization memory induced by polarized light-assisted anodization of n-type Si 235
G. Polisski (Garching, Germany), A.V. Andrianov (St. Petersburg, Russia), D. Kovalev, F. Koch (Garching, Germany)

Structure and non-uniform strain analysis on p-type porous silicon by X-ray reflectometry and X-ray diffraction 238
J.M. López-Villegas, M. Navarro (Barcelona, Spain), D. Papadimitriou (Athens, Greece), J. Bassas, J. Samitier (Barcelona, Spain)

Observation of (100) surfaces in p-type porous silicon by electron paramagnetic resonance 241
J.L. Cantin, M. Schoisswohl, H.J. Von Bardeleben (Paris, France), N. Hadj Zoubir, M. Vergnat (Vandoeuvre lès Nancy, France)

Auger lineshape analysis of porous silicon: experiment and theory 244
L. Dorigoni, L. Pavesi, O. Bisi, L. Calliari, M. Anderle (Povo, Italy), S. Ossicini (Modena, Italy)

Photoluminescence and chemical bonding in porous silicon layers—dependence on the P concentration in the Si substrate 248
D. Dimova-Malinovska, M. Kamenova, M. Sendova-Vassileva, Ts. Marinova, V. Krastev (Sofia, Bulgaria)

Metallisation of porous silicon by chemical vapour infiltration and deposition 253
B.J. Aylett, I.S. Harding (London, UK), L.G. Earwaker, K. Forcey, T. Giaddui (Birmingham, UK)

Formation of porous silicon on patterned substrates 257
M. Krüger, R. Arens-Fischer, M. Thönissen, H. Münder, M.G. Berger, H. Lüth (Jülich, Germany), S. Hilbrich, W. Theiss (Aachen, Germany)

The luminescence transition in porous silicon: the nature of the electronic states 261
L. Dorigoni, O. Bisi (Povo, Italy), F. Bernardini, S. Ossicini (Modena, Italy)

Adsorption-induced modification of spin and recombination centers in porous silicon 265
E.A. Konstantinova (Moscow, Russia), Th. Dittrich (Berlin, Germany), V.Yu. Timoshenko, P.K. Kashkarov (Moscow, Russia)

Dependence of PS photoluminescence on relative humidity 268
J. Oswald, J.J. Mareš, J. Krištofík, R. Sedlačík (Praha, Czech Republic)

Red, green and blue luminescence in porous silicon—a study of excitation spectra 272
A. Kux (Saint Martin d'Hères, France), M. Ben Chorin (Garching, Germany)

The dielectric function of some low-dimensional Si and Ge structures 276
H.M. Polatoglou, V. Vlachoudis (Thessaloniki, Greece)

Photoluminescence of laser-deposited porous silicon and its correlation with density of electronic states determined by scanning tunnelling microscopy 279
R. Laiho, A. Pavlov (Turku, Finland)

Stability of electroluminescence and photoluminescence of porous silicon 284
F. Kozlowski, A. Wiedenhofer, W. Wagenseil, P. Steiner, W. Lang (München, Germany)

Stable and efficient cathodo- and photoluminescence from ultrathin porous silicon layers 287
V.Yu. Timoshenko, A.R. Gareeva, P.K. Kashkarov, V.I. Petrov (Moscow, Russia), I. Sieber, Th. Dittrich (Berlin, Germany)

Recombination with larger than bandgap energy at centres on the surface of silicon microstructures 290
P. Deák, Z. Hajnal, J. Miró (Budapest, Hungary)

Silicon needles in porous silicon 293
P. Lavallard (Paris, France), R.A. Suris (St. Petersburg, Russia)

Electroluminescence from aluminum–porous silicon reverse-biased Schottky diodes formed on the base of highly doped n-type polysilicon 296
S. Lazarouk, V. Bondarenko (Minsk, Belarus), S. La Monica, G. Maiello, G. Masini (Rome, Italy), P. Pershukevich (Minsk, Belarus), A. Ferrari (Rome, Italy)

Electroluminescence from porous silicon using a conducting polyaniline contact 299
D.P. Halliday, E.R. Holland, J.M. Eggleston, P.N. Adams, S.E. Cox, A.P. Monkman (Durham, UK)

Photo-assisted evolution of the photoluminescence spectrum of porous silicon immersed in hydrofluoric acid 303
M. Davison, U.M. Noor, L. Berlouis, D. Uttamchandani, K.P. O'Donnell (Glasgow, UK)

The influence of preparation conditions on the photoluminescence spectra of light-emitting Si prepared by laser pulse irradiation of a-Si:H 306
K.M.A. El-Kader, O. Borusík, Z. Chvoj, I. Ulrych, J. Oswald, I. Pelant, J. Stuchlík, V. Cháb, J. Kočka (Prague, Czech Republic), T.E. Dyer, J.M. Marshall (Swansea, UK)

Characterization of silicon-implanted SiO_2 layers using positron annihilation spectroscopy 310
G. Ghislotti, B. Nielsen, P. Asoka-Kumar, K.G. Lynn, C. Szeles (Upton, NY, USA), C.E. Bottani (Milano, Italy), S. Bertoni, G.F. Cerofolini, L. Meda (Novara, Italy)

Microscopic characterization of microcrystalline silicon thin films 314
I. Sieber, I. Urban, I. Dörfel (Berlin, Germany), S. Koynov, R. Schwarz (Garching, Germany), M. Schmidt (Berlin, Germany)

Visible luminescence from C-containing silicon oxide films 318
M. Sendova-Vassileva, N. Tzenov, D. Dimova-Malinovska, Ts. Marinova, V. Krastev (Sofia, Bulgaria)
